

OPEN LETTER TO PRESIDENT TRUMP CONCERNING HIS ENDORSEMENT IN FLORIDA'S 3RD CONGRESSIONAL DISTRICT

April 12, 2022

Dear President Trump:

I am running in the Republican Party primary in FL-3 against Kat Cammack. I am writing in response to reports that you have endorsed her. Kat Cammack has refused to take a position on any of the matters below. In this solidly conservative district, you have an opportunity to install a proven warrior who will fight on your behalf.

Kat Cammack is not a leader, and she lacks the capacity to fight the Leftists and the establishment Republicans who installed her in her seat.

I am certain that once you hear the truth about what Kat Cammack is tacitly opposing and covering up, you will withdraw your endorsement of Kat and will endorse me and my proposed legislation.

The truth is that through his sole control of the US Judicial Conference, Chief Justice John G. Roberts Jr. authorized federal trial court judges to exceed their authority and interfere with your presidential executive power. The judges were then able to order one nationwide injunction after another in violation of your constitutional power and political discretion.

The larger truth is that I have discovered the monumental mistakes that the 96th Congress made in the "Judicial Conduct Act of 1980." These mistakes provide a loophole that allows a chief justice to misuse his position as the presiding officer of the US Judicial Conference and exercise unconstitutional executive power. This is how Roberts directed and authorized the violations against you. This explains how the Constitution and its values and rights have been defeated. Knowing this makes it easy to understand the truth of many other national matters.

I used my discovery to create "The Eva Asensio Anti-Judicial Corruption Act of 2023" in honor of my daughter. It closes the 96th Congress's loophole and abolishes the presiding officer of the US Judicial Conference's unconstitutional executive power. This is a power Congress did not intend to grant to the chief justice. Congress cannot grant any government official this type of power.

My legislation eliminates Roberts's ability to organize nationwide judicial misconduct and restores the rightful powers of Congress and the President to "take care that law is faithfully executed" in accordance with the Constitution.

With this new information, former Vice President Mike Pence should understand that he had a greater role in certifying the electoral votes than he was led to believe by the lawyers and the retired judge he trusted. All of them had interests in protecting Roberts's power over the US Judicial Conference's apparatus and were invested in pro-federal judiciary ideologies. Pence had a legal and moral duty to resist the federal judges and to turn the matter over to Congress for a full investigation into the constitutional and factual issues in the election.

By tacitly opposing and covering up my legislation, Kat Cammack is acting against the Constitution's doctrines, values, and principles, and the policies of the America First and Trump Movement. Kat is adopting anti-Trump positions.

Correcting the 96th Congress's errors in the Judicial Conduct Act paves the way for your triumphant return to the presidency. I wrote and produced a children's story book titled "*Trump Unites All Americans*" where Eva runs to you to inform you of the 96th Congress's mistake, and you straighten the whole mess out.

These truths will reunify all Americans under our nation's great Constitution. Only someone interested in protecting Roberts's insanely undemocratic power or the advancement of WOKE totalitarianism in America would oppose the Eva Act.

Your supporters deserve better than Kat Cammack. I am certain that once you hear the whole true story you will withdraw your endorsement of Kat and will endorse me and my proposed legislation.

Thank You and God Bless America.

Respectfully,

Manuel P. Asensio

Manuel P. Asensio
Candidate for Republican
Congressional Nomination
